## Accessories & Parts

### THERMOSTATS

#### Flush mounted APDS Digital Room Thermostats

Thermostats should be connected to the fancoils for their control and management.

The thermostats offer the following features which vary depending on the model:

- ✓ Illuminated display with timed-delayed auto power-off
- ✓ Simple and intuitive to operate
- ✓ Automatic or manual control of the three fan coil speeds
- ✓ Summer and winter operation modes
- ✓ Two temperature sensors (internal/external)
- ✓ Can be controlled remotely (626C)
- ✓ Twelve-speed chance for finer control (625LGm)

#### Thermostat 626A 3 SPEED

Flush mounted digital room thermostat to manage the temperature, Frigomar "APDS" model, with manual/automatic control of the three fan coil speeds and Summer/Winter operation modes.

Backlit LCD with timed-delayed auto power-off. Power box.

It can command multiple fancoils connected in parallel to the remote power box.

Support for standard Bticino, Vimar, Legrand, Siemens thermostat cover plates

## Thermostat 626C 3 SPEED

Flush mounted digital room thermostat to manage the temperature, Frigomar "APDS" model, with manual/automatic control of the three fan coil speeds and Summer/Winter operation modes.

Backlit LCD with timed-delayed auto power-off. Power box with ModBUS connection for automated management.

It can command multiple fancoils connected in parallel to the remote power box.

Support for standard Bticino, Vimar, Legrand, Siemens thermostat cover plates.

## Thermostat 625LG 12 SPEED

Flush mounted digital master room thermostat to manage the temperature, "APDS 12V" model "LGm" version with manual/automatic selection of the twelve fan coil speeds and Summer/Winter modes.

Backlit LCD with timed-delayed auto power-off. Power box. Two temperature sensors, internal and external. ModBUS connection for automated management.

It can command multiple fancoils connected in parallel to the remote power box.

Support for standard Bticino, Vimar, Legrand, Siemens thermostat cover plates.
